

NEUROBAN Challenger

Impact Mitigation Headwear

Deceleration always refers to acceleration in the direction opposite to the direction of the velocity. Deceleration ALWAYS reduces speed!
ISAAC NEWTON

Say NO to Concussion. TRIALS NOW STARTING

I am seeking the support of those who will most benefit from protection provided by NEUROBAN *Challenger* in counteracting brain damaging kinetic forces resulting from the head colliding with hard surfaces. At last, after twenty months of development, the final prototypes are available for you to trial.

Volunteers are required NOW for trials in the 2025 season. I wish to provide FREE OF CHARGE, one custom fitted NEUROBAN *Challenger* to individual players with a keen interest in putting an end to Traumatic Brain Injury in sport. The aim of the trials is to evaluate real world functionality, comfort, general acceptance levels, and to provide records of head impacts over the 2025 season as evidence of the effectiveness of this long awaited solution to concussion.

Your identity and trial results will not be used for any purpose other than my approach to your codes administration and/or possible Grant application.

Please find attached documents for further in-depth information:

- NOT A HELMET – Is not, *and should not be compared*
- NEUROBAN Challenger OVERVIEW – *About*
- NEUROBAN Challenger and EVA Foam – *Product selection*
- ROTATIONAL CONCUSSION - *A discussion worth having*
- PRODUCT SELECTION AND TESTING – *Hit a brick wall at 25kph*

Please contact ASAP to register your interest.
